Celebrate 45 Years of Cancer Research with a Matching Campaign

Wood Hudson Cancer Research Laboratory is preparing to celebrate its 45th anniversary of advancing cancer research and education on January 26, 2026. As we look forward to commemorating this milestone, we are launching a special matching gift campaign to support our mission. A generous donor has once again offered an extraordinary challenge. Once we reach an initial \$15,000 in donations, this donor will match that amount 100%, DOUBLING those contributions. After that milestone is met, the donor will continue to match every dollar donated up to another \$45,000 to celebrate the 45th anniversary. That means Wood Hudson could potentially receive up to \$60,000 in matching funds to support our work.

The opening \$15,000 campaign runs through December 26, 2025, the anniversary date of Wood Hudson's initial filing of its articles of incorporation. This matching continues as our End of the Year campaign then extends throughout the entire first quarter of 2026, which includes our 45th anniversary of incorporation on January 26th. Every gift and matching donation will help advance both our studies on cancer biology and our undergraduate research education program.

Please join us in celebrating 45 years by making your gift today to DOUBLE your impact with this matching opportunity. If your employer offers a gift matching program, taking advantage of this generous matching period can be particularly powerful, as your employer's match could also be matched if received in time. Please give today and help us continue our contributions to research and education!

Congratulations, Carole!

Our heartfelt gratitude and best wishes to Carole Ewald, who is retiring after 23 years. Carole has been an integral part of Wood Hudson, supporting the front office and contributing to the success and daily operations of our organization.

Throughout her tenure, Carole served in many roles, but most notably as the voice behind the phone and the hand behind donation letters and administrative communications. Her professionalism and reliability have been appreciated. We wish her much happiness in her retirement and thank her for her dedication to the laboratory.

“I Have Wings” Leadership Tour Wood Hudson

Wood Hudson was honored to host the leadership of the “*I Have Wings*” Breast Cancer Foundation for a tour of our facilities. Founded by breast cancer survivor Janet Chambers, “*I Have Wings*” is a dedicated nonprofit organization that provides education, emotional support, and financial assistance to women in the Tri-State area who are facing breast cancer. We were pleased to welcome Executive Director and Founder Janet Chambers, (pictured above, center) along with Board Members Emily Hanna (left) and Connie Flynn (right) to the laboratory for a visit.

The organization’s mission helps ensure that no woman fights alone by offering vital resources and hope during treatment and recovery. Through their outreach, “*I Have Wings*” continues to uplift and empower individuals and families affected by breast cancer. This commitment to improving lives across the region serves as an inspiration to all who share the goal of conquering cancer.

“*I Have Wings*” Breast Cancer Foundation has long been a supporter of Wood Hudson, helping to fund studies related to breast cancer research. Our team was pleased to showcase how philanthropic partnerships directly strengthen both our research capacity and our educational mission. We are grateful for their continued partnership and shared commitment to scientific discovery and community impact.

Support Wood Hudson Today!

Donors provide vital support for our research and student program. Thank you so much for all that you have done throughout the years in support of our mission of cancer research and education at Wood Hudson. Donate today as part of our matching campaign!
